

Minimum System Requirements

Hardware

- Any multimedia computer (including sound card and speakers) that can run an Internet browser
- 28.8 bps or faster modem

Software

- Web browser: Microsoft's Internet Explorer 4.0 (or higher) or Netscape 4.5 (or higher)
- Adobe Acrobat Reader or the AlternaTIFF image viewer to view your faxes.
 - To download the latest version of Acrobat Reader, point your browser to <http://www.adobe.com/products/acrobat/readstep.html>.
 - To download the latest version of AlternaTIFF, point your browser to <http://www.mieweb.com/alternatiff>.
- To listen to your messages, you will need a player that will play the MP3 format. Popular players include Nullsoft's WinAmp or Microsoft MediaPlayer (included with Windows 95, Windows 98, or Windows 2000) to stream your voice mail over the Internet.

For assistance with listening to messages or viewing faxes, please contact CommuniKate Customer Service at 1-800-760-5176.

Acquiring an MP3 player

If a media player is not already installed on your computer, you can download WinAmp or MediaPlayer for free from their respective websites.

Point your browser to <http://www.microsoft.com/windows/windowsmedia/en/download/default.asp> (for Microsoft MediaPlayer).

You will likely need to provide information about your computer's operating system, processor, and Internet connection or modem speed. Tip: For your modem's speed, choose "28.8" if you do not know your modem speed or are using a fast connection to the Internet.
